INTERIM MANAGEMENT REPORT

STRATEGY AND BUSINESS MODEL

Hybrid Software Group PLC is a public limited-liability company registered in England and Wales with its shares traded on Euronext Brussels under stock code HYSG. It is headquartered near Cambridge, UK.

Hybrid Software Group PLC is a software company which develops enterprise software for industrial print manufacturing processes which use inket and other printing techniques, with 288 employees worldwide and a pedigree stretching back more than 30 years. The Company's products are critical because efficiency and sustainability concerns are driving the conversion of manufacturing processes from traditional analogue methods to just-in-time digital production using inkjet printing. Applications for inkjet printing include a diverse range of goods, from labels and packaging, to textiles, tiles, laminates, wall coverings, additive manufacturing and 3D printing applications.

The Company is the only full stack supplier of all the critical core technologies needed for inkjet printing. Our principal customers are Original Equipment Manufacturers (OEMs) of digital printing equipment, including high-speed digital production presses, professional colour proofing devices, wide format colour printers, and industrial inkjet printers for ceramic tiles, packaging, textiles and additive manufacturing, as well as end users, primarily printing companies who purchase these devices to print and convert labels and packaging materials.

Hybrid Software Group has traditionally provided software components and printhead drive electronics to OEMs to enable them to build their own solutions. However, the strategic acquisitions made over the last several years now enable the Company to provide full turnkey solutions for OEMs which enable them to bring new digital printing devices to market faster and with higher quality. These solutions are higher value and provide more revenue to the Company per device installed. Furthermore, the OEM business is synergistic with the Company's end-user products, accelerating revenue growth and increasing the Company's market share in the inkjet space.

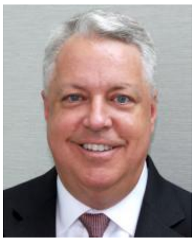
BUSINESS REVIEW

CEO'S REVIEW



Hybrid Software Group performed well in the first half of 2024, with rising revenues in all business segments and a significant improvement in profitability. It's a pleasure to report this good news after several challenging years, with the COVID-19 pandemic, the war in Ukraine, and rising interest rates all impacting the global printing industry and our business results.

On the macro level, conditions haven't changed much. We've learned to live with COVID. The conflicts in Ukraine and Gaza are still ongoing. Interest rates haven't fallen, extending the challenging sales climate for capital equipment and enterprise software. So, the improvements in our figures in the first half of 2024 are mainly intrinsic to the company: effective sales strategies, improvements in operations, and revenue growth as our OEM customers begin shipping new equipment built with HYSG technology and components.

Overall, our revenues grew 8.1% over the first half of 2024, with all three of our reporting segments seeing growth in the range of 7% - 10%. This indicates the overall health and continuing recovery of all segments. It's fair to question whether this revenue growth is a one-time boost from the Drupa trade show, a major industry event that took place in late May and early June. But that is not the case, and in fact the opposite is true. The second quarter brought higher costs as we paid for our 300-square meter stand at Drupa, but the revenue from the deals we closed at the show will mainly come in Q3 and Q4 as products are delivered to customers. In addition, the quarter before Drupa often brings a decline in sales, since customers tend to wait for new product announcements at the show before committing to purchase hardware or software.

Drupa was a successful show, and Hybrid Software was the only company (out of more than 1,600 exhibitors) showcasing a full solution stack developed in-house for digital printing. The market understands that our products are second to none and this will continue to benefit Hybrid Software Group in many ways, but Drupa was not the reason for our improved revenue in the first half of the year.

To explain this, it's necessary to look deeper into the underlying businesses. Printing Software benefited from a long-term contract renewal from a major OEM customer in Japan, as well as operational improvements from the streamlined organisation that was implemented last year. The number of digital printer vendors who have chosen our SmartDFE product as their Digital Front End continues to grow, and the sales funnel is quite healthy as we enter the second half of the year. Printhead Solutions saw improved margins as the chip shortage recedes and component prices continue to drop, as well as an increase in volume across a broad base of customers worldwide. And Enterprise Software, our largest segment, enjoyed a healthy recovery in Germany and North America, as well as continued strong sales throughout western Europe and Australia. Our hosted SaaS offerings continue to gain momentum with enterprise customers worldwide, and our sales team is pursuing many new opportunities resulting from Drupa.

One of the key issues discussed in our 2023 annual report was profitability. Our adjusted net profit improved in 2023 but was not at the level we would expect for a technology-driven company like Hybrid Software Group. The first semester also brought a significant boost in profitability, with our EBITDA up 75% and adjusted operating profit up 188% from last year's figures to €6.48 million and €4.38 million, respectively. With our continued focus on business efficiency and additional revenue growth foreseen, we expect further improvements in profitability in the second half of the year.

As the only full-stack technology provider for digital inkjet printing, we maintain our commitment to innovation on behalf of our customers and stakeholders as we continue to execute our growth strategy. I would like to personally thank our dedicated employees as well as all shareholders for your continued support.

Outcome of the Annual General Meeting

All of the proposed resolutions were passed by the shareholders at the Company's Annual General Meeting ("AGM") on 8 May 2024.

At the AGM, the Company's board of directors was appointed as follows:

- Guido Van der Schueren, Chairman
- Michael Rottenborn, Chief Executive Officer
- Joachim Van Hemelen, Chief Financial Officer
- Clare Findlay, Non-Executive Director
- Luc De Vos, Non-Executive Director

Under the Company's articles of association, all directors must retire at every AGM, but are entitled to stand for re-election at that AGM. More information about the resolutions passed at the AGM can be found in the investor's section of the Company's website at https://www.hybridsoftware.group/investors/shareholders-annual-general-meeting.

CFO's Review

The following information is unaudited.

Financial highlights

- Revenue for the period was €26.92 million (2023: €24.91 million)
- Gross profit for the period was €22.90 million or 85.1% of revenue (2023: €20.51 million or 82.3%)
- Pre-tax profit for the period was €1.87 million (2023: €0.92 million loss)
- EBITDA for the period was €6.48 million (2023: €3.71 million)
- Cash at 30 June 2024 was €8.04 million (at 31 December 2023: €7.08 million)

Revenue

Revenue for the period was €26.92 million, compared with €24.91 million for the same period in 2023, an increase of 8.1%. At constant exchange rates (2024 restated at 2023 exchange rates), revenue would have been €26.68 million.

Printing Software segment revenue increased by 7.0% when compared to the prior period. During the period a customer in the Printing Software segment extended the term of their contract, which resulted in €3.32 million of license revenue being recognised in the period. During the first half of 2023 a first marquee sale of our new Digital Front End, SmartDFE closed in the Printing Software segment which resulted in the recognition of €2.61 million in license revenue.

Revenue in the Printhead Solutions segment increased by 9.3% when compared to the prior period.

Enterprise Software segment revenue increased by 8.4% when compared to the prior period.

For the Group as a whole, licence royalties accounted for 48.8% (2023: 44.6%) of revenue, maintenance and after-sale support accounted for 20.3% (2023: 21.6%), driver electronics accounted for 19.7% (2023: 19.2%), services accounted for 8.9% (2023: 12.3%), printer hardware and consumables accounted for 2.1% (2023: 2.1%) and other items accounted for 0.2% (2023: 0.2%).

Customer concentration and the reliance on a small number of customers for a high proportion of the Group's revenue has increased year on year. The ten largest customers represented 35.8% (2023: 33.0%) of the Group's revenue, the five largest customers represented 28.5% (2023: 26.2%) of the Group's revenue and the single largest customer represented 12.3% (2023: 10.9%) of the Group's revenue. There was one customer (2023: one) during the period that represented 10% or more of total revenue.

Pre-tax result

The pre-tax result was a profit of €1.87 million for the period, compared with a loss of €0.92 million for the same period in 2023.

Gross profit for the period was 85.1% of revenue. For the same period in the prior year, it was 82.3% of revenue.

The increase in margin percentage is primarily due to the revenue increase in software versus driver electronics related revenue during the period.

Total operating expenses decreased by €0.4 million, or 2.0% compared to the same period in the prior year.

The foreign exchange losses are primarily due to the revaluation of currency balances held at the balance sheet date and the change in exchange rates during the period.

EBITDA

EBITDA is reported as an alternative measure of profit and is calculated by adding back interest, tax, depreciation and amortisation to net profit.

EBITDA for the period was €6.48 million (2023: €3.71 million) and is reconciled to net profit as follows:

In thousands of euros *(unaudited)*	**2024**	**2023**
IFRS reported net profit/(loss) from continuing operations	2,151	(334)
Net finance expenses	38	124
Tax credit	(281)	(588)
Depreciation	740	760
Amortisation	3,835	3,745
EBITDA from continuing operations	**6,483**	**3,707**

Cash

Cash balances were valued at €8.04 million on 30 June 2024 (31 December 2023: €7.08 million).

Loan repayments of €1.00 million were made to Congra Software S.à r.l., consisting of €0.90 million in principal repayments and €0.10 million of interest (see notes 14 and 18).

The Group continues to generate sufficient cash to fund its day to day operational expenditure and capital expenditure on property, plant and equipment and has overdraft facilities available if required.

Adjusted financial results

Management believes that evaluating the Group's ongoing results may not be as useful if it is limited to reviewing only IFRS financial measures, particularly because management uses adjusted financial information to evaluate its ongoing operations and for internal planning and forecasting purposes.

Management does not suggest that investors should consider these adjusted financial results in isolation from, or as a substitute for, financial information prepared in accordance with IFRS. The Group presents adjusted financial results in reporting its financial results to provide investors with an additional tool to evaluate the Group's results in a manner that focuses on what the Group believes to be its underlying business operations. The Group's management believes that the inclusion of adjusted financial results provides consistency and comparability with past reports and comparability to similar companies in the Group's industry, many of which present the same or similar adjusted financial information to investors. As a result, investors are encouraged to review the related IFRS financial measures and the reconciliation of these adjusted results.

PRINCIPAL RISKS AND UNCERTAINTIES

The principal risks and uncertainties to the Group can be found on pages 46 to 51 of the Company's annual report for the year ended 31 December 2023.

For the remaining six months of this financial year, management's view is that the principal risks are credit risk from trade receivables and the economic slowdown of the world economy due to the effects of inflationary pressures and monetary tightening imposed by the World's most important central banks.

The Group does not have any operations in Ukraine and does not generate any revenue from either Russia or Ukraine, thus is not directly affected by the current situation. However, the Group sells to customers which are experiencing the effects of this on their businesses.

The Group does not have any operations in Israel but has significant customers in this country. Currently this has only marginally impacted business levels in the region. If the situation were to worsen and spread to other countries, there could be a negative impact on the demand for the Group's products and services, which could impact the Group's revenue and profitability.

The slowdown of economic activity in many markets where the Group operates is a concern for the Board of Directors, which continues to monitor the situation closely. If it were to worsen and spread to other countries, there could be a negative impact on the demand for the Group's products and services, which could impact the Group's revenue and profitability.

RESPONSIBILITY STATEMENTS UNDER THE DISCLOSURE AND TRANSPARENCY RULES

Each of the appointed directors listed on page 2 of this report confirm that to the best of their knowledge that:

- the unaudited condensed consolidated interim financial statements, prepared in accordance with IAS 34 Interim Financial Reporting and applicable law, give a true and fair view of the assets, liabilities, financial position and results of the Company and the undertakings included in the consolidation taken as a whole; and
- the interim management report contains a fair review of the important events and major transactions between affiliated parties which have occurred during the first six months of the current financial year and of their impact on the summary of the financial statements as well as a description of the principal risks and uncertainties for the remaining six months of the current financial year.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. REPORTING ENTITY

Hybrid Software Group PLC (the "Company") and its subsidiaries (together the "Group") is a leading developer of integrated software platforms on which our partners create solutions for digital printing, digital document and PDF applications. It is also a leading supplier of drive electronics for industrial inkjet printing.

The Company is a public limited company, registered in England and Wales, domiciled in the United Kingdom and is quoted on Euronext in Brussels. The Company's registered office address is 2030, Cambourne Business Park, Cambourne, Cambridge, CB23 6DW.

2. BASIS OF PREPARATION

These unaudited condensed consolidated financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting in conformity with the requirements of the Companies Act 2006 and in accordance with international financial reporting standards adopted pursuant to Regulation (EC) No 1606/2002 as it applies in the European Union ("IFRS"). They do not include all the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual consolidated financial statements as at and for the year ended 31 December 2023.

The accounting policies and methods of computation adopted are consistent with those as described in the Company's consolidated financial statements for the year ended 31 December 2023.

There are no new or amended interpretations or standards effective for the financial year commencing 1 January 2024 that have had a material impact on the Group.

These unaudited condensed consolidated interim financial statements were authorised for issue by the Company's board of directors on 24 July 2024.

Basis of measurement

These unaudited condensed consolidated interim financial statements have been prepared on the historical cost basis, except, if applicable, for the revaluation of derivative instruments at fair value through profit or loss.

Non-current assets are stated at the lower of amortised cost and fair value less disposal costs when applicable. The methods used to measure fair value are discussed in note 4 of the Company's annual report for the year ended 31 December 2023.

Functional and presentation currency

These unaudited condensed consolidated interim financial statements are presented in euros, which is the Company's functional and presentation currency.

All information which is presented in the following notes has been rounded to the nearest thousand, unless otherwise specified.

Use of accounting estimates

The preparation of the unaudited condensed consolidated financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2023.

Going concern

On the date these unaudited condensed consolidated interim financial statements were approved, based on their review of cash flow projections prepared by management for the years ending 31 December 2024 and 2025, the members of the Company's board of directors have no reason to believe that a material uncertainty exists that may cast significant doubt about the Group's ability to continue as a going concern, primarily because of the cash position of €8.04 million as at 30 June 2024 (31 December 2023: €7.08 million), and the only committed, interest bearing debt is to the Company's major shareholder.

3. OPERATING SEGMENTS

Identification of reportable segments

Management has determined the operating segments based on the reports reviewed by the Group's Chief Executive Officer ("CEO") that are used for deciding how to allocate resources and also in assessing both operating and financial performance of each segment. The Group's CEO is considered as the Group's chief operating decision maker ("CODM").

The Group's segments are:

- Enterprise Software, for enterprise workflow software used primarily for the production of labels & packaging;
- Printhead Solutions, for electronics and software developed for industrial inkjet printing;
- Printing Software, for digital printing and colour management software; and
- Group, for group related expenses that are not allocated to another segment.

Measurement of the operating segments' profit is assessed against revenue forecasts and expense budgets, excluding non-operating IFRS items such as the amortisation of intangible assets acquired through acquisition.

The following tables provide information on revenue, profit, interest, depreciation and amortisation, tax and EBITDA as reported to the CODM for each of the Group's operating segments for the 6 months ended 30 June 2023 and 30 June 2024. The Group has disclosed these amounts for each reportable segment because they are regularly provided to the CODM or are required to be disclosed by IFRS 8. Assets and liabilities by segment are not regularly reported to the CODM.

Inter-segment revenues are included in cost of sales for the reciprocal segment and are eliminated on consolidation. Group amounts relate to expenses incurred by the Group's parent company (Hybrid Software Group PLC) and exchange gains and losses that are not attributable to a particular operating segment.

Segment EBITDA is calculated by adding back interest, depreciation, amortisation and tax to segment operating profit/(loss) after tax.

Revenue recognised over time is for performance obligations that are performed over time and include maintenance and after-sale support, some services and some licence royalties that are not perpetual licences. All other revenue is recognised at a point in time.

The ten largest customers represented 35.8% (2023: 33.0%) of the Group's revenue, the five largest customers represented 28.5% (2023: 26.2%) of the Group's revenue and the single largest customer represented 12.3% (2023: 10.9%) of the Group's revenue. There was one customer (2023: one) during the year that represented 10% or more of total revenue.

During the period a customer in the Printing Software segment extended the term of their contract, which resulted in €3.32 million of license revenue being recognised in the period. During the first half of 2023 a first marquee sale of our new Digital Front End, SmartDFE closed in the Printing Software segment which resulted in the recognition of €2.61 million in license revenue.

The following table shows revenue expected to be recognised in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as of 30 June 2024.

7. OTHER INTANGIBLE ASSETS (CONTINUED)

Intangible assets that are subject to amortisation are reviewed annually for indicators of impairment or whenever events or changes in accounting estimates indicate that the carrying amount may not be recoverable. If an indicator of impairment is identified, a full impairment review is performed with the calculations being based on the discounted cash flows over the remaining period of amortisation of the capitalised development expense and use the same discount rate and exchange rates that were used for the impairment review of Goodwill (see Note 8 'Goodwill'). These intangible assets are also allocated to a CGU containing goodwill and are tested annually for impairment as part of the goodwill impairment review (see Note 8 'Goodwill').

There was no significant change during the period to the calculations and assumptions used at 31 December 2023 to identify any requirement to impair any of these intangible assets. It was concluded that there were no indicators of impairment and no impairment was required for the six months ended 30 June 2024 (2023: €nil).

For individual intangible assets material to the financial statements, the following table shows the remaining amortisation periods and the carrying amounts:

8. GOODWILL (CONTINUED)

The Group is required to test annually, or more frequently if facts and circumstances justify a review, if goodwill and other intangible assets with indefinite useful lives have suffered any impairment during the year.

Having reviewed the revenue and operating result for the six months ended 30 June 2024 against the forecast used for the impairment review at 31 December 2023, it was concluded that there were no indicators of impairment and no impairment was required for the six months ended 30 June 2024 (2023: €nil).

Goodwill is allocated to cash-generating units (CGUs) for the purposes of impairment testing. The CGUs identified were Global Graphics Software, Meteor Inkjet, Xitron, HYBRID Software and ColorLogic.

The table below shows the allocation of goodwill to the CGUs.

9. TAX (CONTINUED)

Deferred tax (continued)

Deferred tax assets are recognised for tax losses available for carrying forward to the extent that the realisation of the related tax benefit through future taxable profits is probable. Deferred tax is measured at the tax rates that are expected to apply to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. On 24 May 2021 the UK tax rate increase from 19% to 25% from 1 April 2023 was substantively enacted. This will have a consequential effect on the group's future tax charge, but no estimates of the potential effect have been made. Notes to the unaudited condensed consolidated interim financial statements (continued)

The deferred tax asset at 30 June 2024 has been calculated based on the rates expected to be in force at the time of utilisation. The deferred tax liability at 30 June 2024 has been recognised as a result of acquisitions in different tax jurisdictions at the rates prevailing in those jurisdictions. The rates range from 17% to 30%.

12. LEASES

Group as lessee

The Group leases office facilities and motor vehicles. The office leases typically run for a period of 6 years with an option to renew the lease at the end of the term and motor vehicle leases typically run for 3.5 years. Lease payments are agreed at the inception of the lease and at any subsequent renewal.

Right-of-use assets

In thousands of euros	Land and buildings	Motor vehicles	Total
Balance at 31 December 2022	2,834	78	2,912
Additions	-	45	45
Depreciation charge for the year	(694)	(69)	(763)

Effect of movement in exchange rates	26	-	26
Balance at 30 June 2024 *(unaudited)*	**1,794**	**37**	**1,831**

These right-of-use assets are depreciated on a straight-line basis over the remaining term of the rental agreement. As at the date of these financial statements, the remaining terms range from 3 months to 5.5 years. Remeasurements are the result of an extension to the term of an existing lease.

Lease liabilities

In thousands of euros	**30 June 2024** *(unaudited)*	31 December 2023 *(audited)*
Current	822	824
Non-current	1,460	1,777
Total lease liabilities	**2,282**	**2,601**

It is expected that as a lease matures it will either be extended or replaced by a new lease on similar terms. There are no variable lease payments, all lease payments are for fixed amounts agreed at the outset of the lease.

Amounts recognised in the Consolidated Statement of Comprehensive Income:

	For the six months ended 30 June	
In thousands of euros *(unaudited)*	**2024**	**2023**
Interest on lease liabilities (see note 5)	56	60
Expenses relating to short-term leases	14	38
Total amount recognised in profit or loss	**70**	**98**

A short-term lease is a lease that, at the commencement date, has a lease term of 12 months or less. The Group has elected to apply the recognition exemption under paragraph 5 of IFRS 16 and recognise the associated payments in profit or loss. The short-term leases are leases for office space with a duration of 12 months or less.

Cash out flow for leases:

17. EARNINGS PER SHARE

The basic earnings per share is calculated by dividing the net profit attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the year, excluding those held in treasury. For diluted earnings per share, the weighted average number of ordinary shares in issue during the year, excluding those held in treasury, is adjusted to assume conversion of all dilutive potential ordinary shares. At the period end, those share options where the exercise price is less than the average market price of the Company's ordinary shares were the only dilutive potential ordinary shares.
